ABSTRACT

Student performance in individual courses constitutes a fundamental learning outcome at community colleges, since many students in credit courses have no intention of earning a degree. A study was conducted at Prince George's Community College, in Maryland, to analyze students' final course grades for fall 1995 to determine course pass rates and student progress. Study findings included the following: (1) the collegewide course pass rate was 75%, down from 77% in 1994 and the lowest since 1989; (2) pass rates decreased from 84% in 1994 to 83% in 1995 for occupational courses and from 76% to 74% for general education courses; (3) the pass rate of students in educational development courses was 60%, down 3 percentage points from the previous year; (4) disciplines with high pass rates included nuclear medicine, respiratory therapy, health information technology, English as a foreign language, nursing, radiography, business, criminal justice technology, early childhood management, and paralegal; (5) disciplines with low pass rates included developmental mathematics, real estate, anthropology, engineering, mathematics, and chemistry; (6) women had higher pass rates than men (78% versus 71%); (7) black students had a pass rate of 72%, compared to 81% for white students; and (8) continuing students had a pass rate of 77%, compared to a pass rate of 71% for first-time students. The bulk of the report consists of detailed data tables. (BCY)

COURSE PASS RATES IN FALL 1995

Enrollment Analysis Report EA96-5
March 1996

Introduction

This report presents course pass rate highlights from an analysis of Fall 1995 final grades. Student performance in individual courses constitutes a fundamental learning outcome, as assessed by the faculty. Examination of student outcomes at the course level is especially appropriate at community colleges, since as many as half the students enrolled in credit classes may have no intention of earning a degree.

Methodology

Course pass rates are calculated from final grade distributions. The pass rate represents the percentage of initial course enrollees receiving passing grades, including D and TP (toward passing) grades. The more failures and withdrawals, the lower the pass rate. Pass rates are calculated for each course, discipline, and division, and analyzed by student gender, age, race, and admission status. Pass rates for each discipline and division are reported in this analysis. Also included are pass rates calculated for individual courses with initial enrollments of 100 or more students.

Collegewide Results

The collegewide course pass rate in Fall 1995 was 75 percent, two percentage points lower than Fall 1994 and the lowest since 1989. Students in occupational courses have generally had a higher pass rate than those in general education or developmental studies. In Fall 1995, the pass rate of students in occupational courses was 83 percent, one percentage point lower than Fall 1994. The pass rate of students in general education courses was 74 percent, the lowest since 1989. The pass rate of students in educational development dropped to 60 percent, lower than any semester since 1981.

Divisional Course Pass Rate Trends

Due to consistently above-average pass rates for courses in nursing and allied health, the Health Technology division continued to have the highest divisional pass rate. Divisional pass rates have been relatively stable, except for Physical Education and Educational Development, which have experienced declining pass rates.

Pass Rates by Discipline

Pass rates vary by discipline. In Fall 1995, ten disciplines had pass rates more than 10 percentage points above the collegewide average. Half of the disciplines with these higher pass rates were in Health Technology; four were in Business/Management; and one in Humanities. A detailed table of course completion rates, by discipline, from Fall 1989-1995 is included with this report.

Disciplines with High Pass Rates, Fall 1992-95

In Fall 1995, six disciplines (with at least 30 enrollees) had course pass rates more than 10 percentage points below the collegewide average. The greatest drop occurred in Engineering, which went from a pass rate of 83 percent in fall 1994 to 63 percent in Fall 1995. The department has reported a very large number of withdrawals this past fall, primarily unrelated to academic problems. Mathematics dropped 1 percentage point from Fall 1994. Developmental Math decreased from 61 percent to 52 percent, the lowest completion rate ever in this discipline. Even though the pass rate for Chemistry rose 5 percentage points, it remained 10 percentage points below the college average.

Individual Course Pass Rates

In Fall 1995 the collegewide pass rate was 75 percent. Among courses with at least 100 enrollees, pass rates varied from a low of 44 percent (DVM 003) to a high of 93 percent (Criminal Justice Technology 251). Seven of the identified courses had pass rates more than 10 percentage points above the college mean (85 percent or greater), while twelve courses fell 10 percentage points or more below the collegewide rate (65 percent or less). Seven courses, all in math or science, had pass rates below 60 percent. These are historically the most difficult areas for Prince George's students.

Fall Course Pass Rates by Demographic Group

Pass rates were analyzed by several variables on the student information system. Aggregate rates for selected student categories are presented in the following table. Rates for five previous fall semesters are included for comparison purposes:

Women, students over age 25, whites, and continuing students consistently achieved group course pass rates above the college average. Men, students under 21 years of age, blacks, and first-time college students achieved group course pass rates below the college average. Detailed tables displaying pass rates by each variable and for each discipline are appended.

Subgroup Analysis

Thirty-six student subgroups were generated by crosstabulations of gender, age, race, and admission status variables. Six of these groups have had consistently low pass rates. Of these six groups, only one group showed improvement in overall pass rates over Fall 1994; continuing black males under age 21 improved their pass rate percentage to 63 percent. Pass rates for first-time black males under age 21 and first-time black males 21-25 held steady at 59 and 62 percent respectively. Slight decreases were registered by two other groups: first-time white males under 21 and first-time black females under 21. After increases of two percentage points for each of the past two years, the pass rate for continuing black males age 21-25 dropped to 66 percent, a decrease of 7 percentage points.

Summary

This report has examined course pass rates for each division and discipline, as well as for various subgroups constructed using crosstabulations of demographic data available on the student information system.

The 75 percent collegewide pass rate for Fall 1995 was two percentage points lower than Fall 1994 and the lowest since Fall 1989. Subject areas and student subgroups with pass rates substantially different from the college average have been identified. There was an increase in the proportion of successful course completions by continuing black males under age 21. Of the highest risk groups at PGCC, continuing black males 21-25 had the greatest decrease during Fall 1995, 7 percentage points. First-time black females under 21, and first-time white males under 21 also had pass rate decreases.

Though the actual numbers and percentages vary by semester, the overall pattern in pass rates is relatively stable. Among students at Prince George's Community College, women are more successful than men, older students are more successful that younger students, white students are more successful than minority students, and continuing students are more successful than new students.

Many variables not available on the database impact on student course success. Prior educational experiences, socio-economic background, employment demands, individual motivation and study habits, family responsibilities--these and other variables plausibly related to course success could not be analyzed. This analysis was limited to reporting pass rates for various classifications of courses and students. It was not possible to attempt to explain the differences found.
